CAREER SUMMARY

Junior Software Developer with 1 year of hands-on experience in HTML, CSS, JavaScript, Python (Django) development. Experienced in building responsive web applications, e-learning platforms, AI-powered tools and interactive games. Strong problem-solving ability with a focus on writing clean, maintainable and scalable code.

SKILLS

Frontend: HTML, CSS, JavaScript, Bootstrap, ReactJS, jQuery.

Backend: Python, Django, Java, Spring Boot, Servlets, JDBC

Database: MySQL / SQL

Tools & Platforms: Git, GitHub, VS Code, Web Design, p5.js

SoftSkills: Communication, Problem Solving, Critical Thinking, Team Collaboration, Attention to Detail

WORK EXPERIENCE

YESHIKA TECHNOLOGIES PRIVATE LTD., JUNIOR SOFTWARE DEVELOPER (Web And Learning Management System (LMS) Developer)

Oct 2024 – Present

- Contributed to development of a web-based Learning Management System (LMS)
- Implemented user authentication, course management, assessments, and progress tracking
- Integrated multimedia content and improved UI/UX performance
- Experienced in website design, development, testing, and maintenance
- Worked on 2D game and application development
- Integrated web applications and resolved bugs and performance issues
- Managed content deployment, server uploads, and platform maintenance

Web-Based PowerPoint Editor (HTML, CSS, JavaScript)

Developed a **Web Based Power Point Editor** with an interactive UI for slide creation, editing, and presentation playback. The tool supports adding text, images, videos, audio, tables, and shapes, with features like drag-and-drop positioning, resizing, and rotation

- Built slide management system with create, delete, duplicate, and navigation features
- Implemented drag-and-drop, resize, rotate, duplicate, and undo/redo functionality
- Supported text, images, audio, video, shapes, and tables with advanced text formatting
- Developed real-time slide preview synchronization
- Added presentation mode with fullscreen playback, keyboard shortcuts, and slide transitions
- Designed themes, gradients, shadows, and image cropping
- Built autosave and export (PDF, HTML) preserving layout and formatting

Interactive Learning Games (HTML, CSS, JavaScript, p5.js)

Developed an engaging browser-based educational gaming platform featuring a dot-connecting drawing game and multiple interactive mini-games to enhance children's learning experience.

- Developed a sequential dot-connecting drawing system with painting and erasing tools and multiple brush colors
- Built mini-games including drag-and-drop, match-the-following, and odd-one-out with levels, scoring, star ratings, and feedback audio
- Added interactive sound effects, video pop-ups, and child-friendly UI with animations
- Optimized performance and rendering for smooth gameplay on mobile and tablet devices
- Implemented event-driven programming for dynamic interactivity
- Ensured cross-browser compatibility for seamless user experience
- Integrated progress tracking and user feedback analytics to monitor learning outcomes

Read to Me – Text-to-Speech Application(Python, Tkinter, PyPDF2, pyttsx3)

Developed a desktop-based text-to-speech application that converts PDF and TXT content into interactive audio for enhanced reading accessibility.

- Built PDF/TXT file reader integration using PyPDF2
- Implemented text-to-speech engine with voice selection, speed control, and pause/resume functionality
- Developed word, line, and paragraph reading modes
- Integrated real-time text highlighting synchronized with speech output
- Designed an intuitive Tkinter-based GUI for accessibility and ease of use

AI-Powered PPT Generator(Django, OpenAI GPT-4, Ollama Llama3, python-pptx)

Developed an AI-driven web application that automatically generates curriculum-based presentations for CBSE and State syllabus, significantly reducing manual effort.

- Built automated slide generation system using GPT-4 and Llama-3
- Developed curriculum-aligned content generation for CBSE and State syllabus
- Implemented multilingual slide support (English, Hindi, Kannada, Tamil)
- Integrated AI-based image generation and theme customization
- Automated PPT creation using python-pptx with structured formatting
- Reduced manual slide creation time by 80% through AI automation

LANGUAGES

- English – Fluent
- Hindi – Basic Proficiency
- Kannada – Fluent
- Tamil – Beginner

COURSE AND CERTIFICATION

JAVAFULLSTACKDEVELOPER COURSE

AUTOMATION TESTING

Automation Infotainment Testing

2021-2023

EDUCATION

Bachelor of Computer Application, **Mangalore University**
