PROJECTS

Digital Banking Dashboard Aug 2025 - Oct 2025	Event management system Jul 2024 - Sep 2025
1. Built a complete end-to-end application integrating frontend, backend, and database layers. 2. Gained hands-on experience in API design, database modeling, and microservice architecture. 3. Implemented frontend-backend communication using Axios and RESTful APIs. 4. Enhanced skills in React state management, data visualization, and UI responsiveness. 5. Understood banking domain workflows such as account management, balance calculation, and transaction logging.	Developed a full-stack Event Management System using Java Spring Boot, HTML, and CSS. Implemented user and admin roles, CRUD operations, and event registration system. Used Spring Data JPA with MySQL for backend data management. Designed responsive UI for event listing and booking functionality.
